TITLE INDEX

Analysis of storage policies for miniload AS/RS, 311
Capacity allocation and material flow in planning group technology cells, 217
Comparing cost estimates of processes at different stages of development, 183
Computer-aided 'foundry specific' planning and estimation system: Its development and some operating results, a, 55
Cost and price indices, 77, 157
Economic comparison of manual and mechanical make filleting, 89
Economic evaluation of investments in new production technologies, 241
Efficient algorithm to cluster order picking items in a wide aisle, an, 263
Findings on joint replenishment of items with stochastic demand and backordering, some, 125
Implementing just-in-time concepts into European companies, 27
Improving storage and order picking in a person-on-board AS/R system: A case study, 273
Industrial dynamics model building of a close-coupled production–distribution system, 295
Inspection decision theory: Deming inspection criterion and time-adjusted rate-of-return compared, 111
Inventory replenishment policies for the case of decreasing trend in demand, 169
Inventory system costs: Source data for analysis, 1
Lot sizing in a practical manufacturing system, 13
Order batching algorithms for a man-on-board automated storage and retrieval system, 285
Orderbook profiles: Managing beyond the schedules, 65
Physical system theory approach to material flow and productivity analysis, a, 207
Planning method of production for an iron industry through the analysis of the Break Even Point, a, 175
Product cost-estimation by the designer, 189
Productivity measurement in multi-product manufacturing firms, 39
Productivity movement and measurement in Taiwan: A case study, 97
Reorder point inventory models for stationary and non-stationary demand, 199
Shale beneficiation and oil recovery from the concentrate, 135
Warehouse logistic systems – A CAD model, 229
